

Restaurant recommendation website

Aim: To let user have a random restaurant suggestion and submit their favourite restaurant inside the list.

Website features:

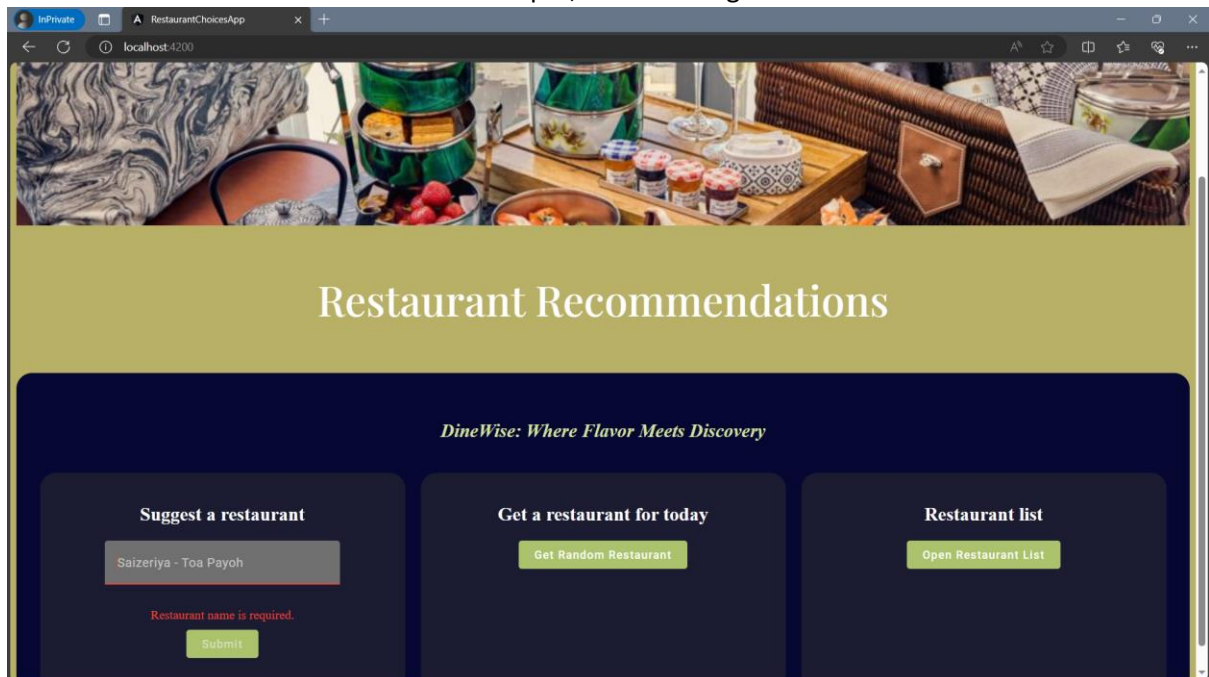

- 3 functions (restaurant submission, get a random restaurant, restaurant list)

1. Restaurant submission

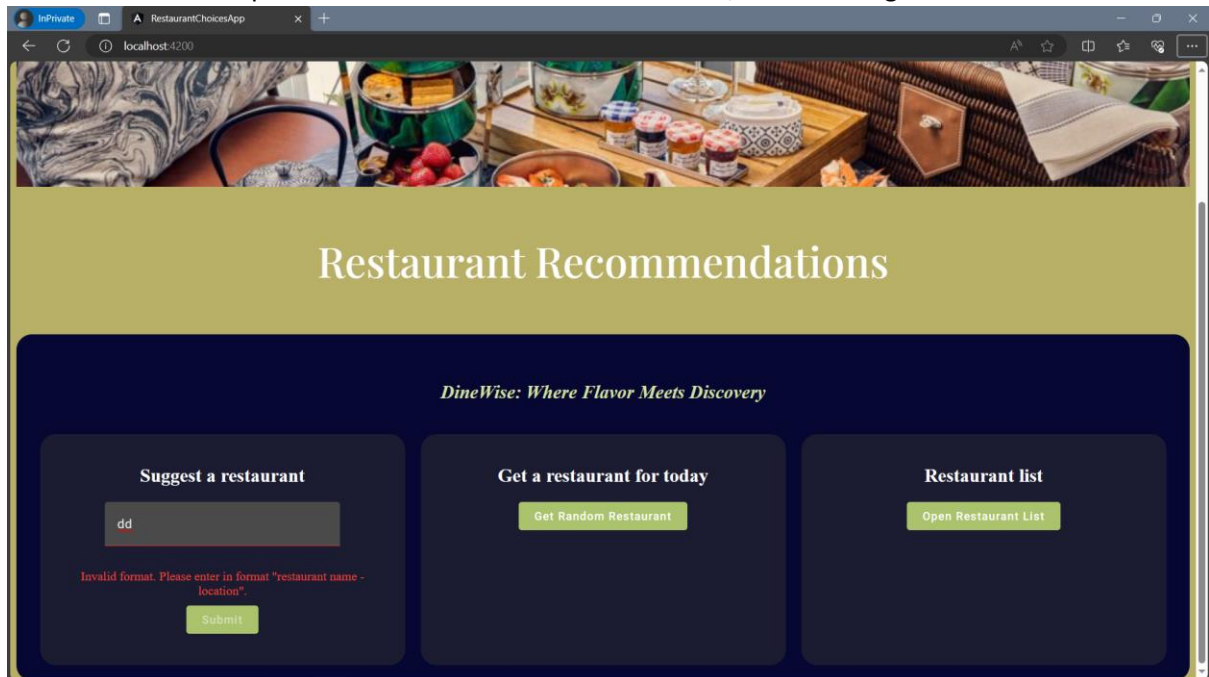

Restaurant submission

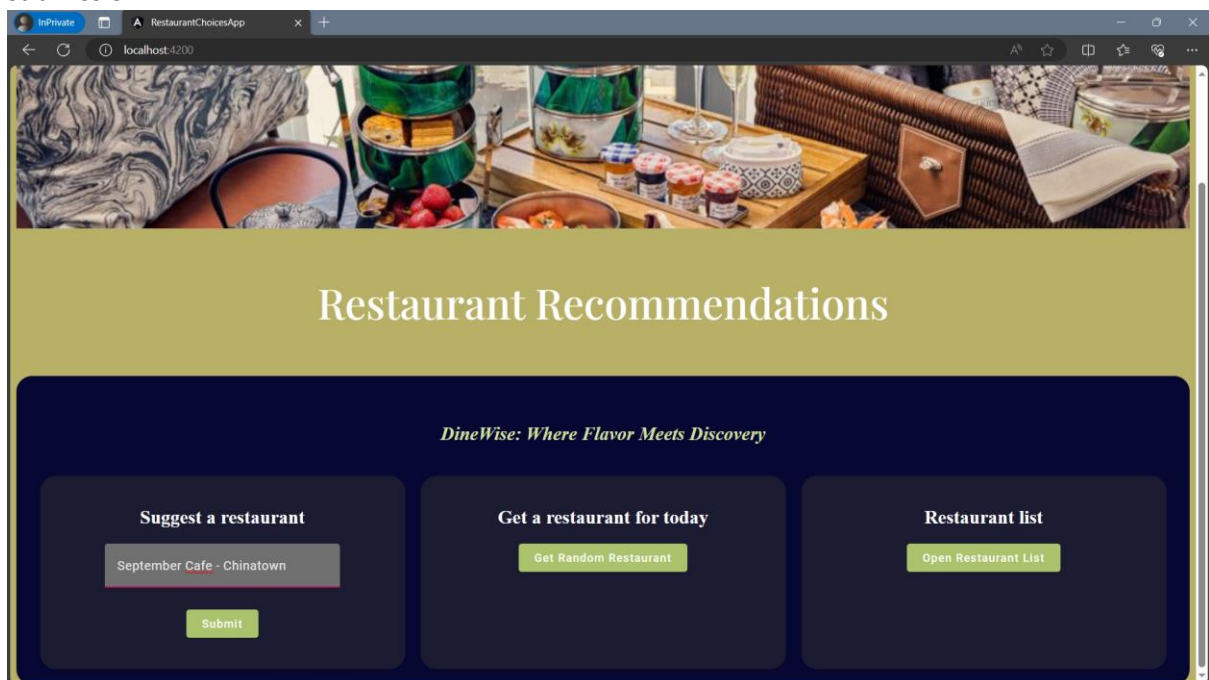

If restaurant name field is touched but no input, error message shows.

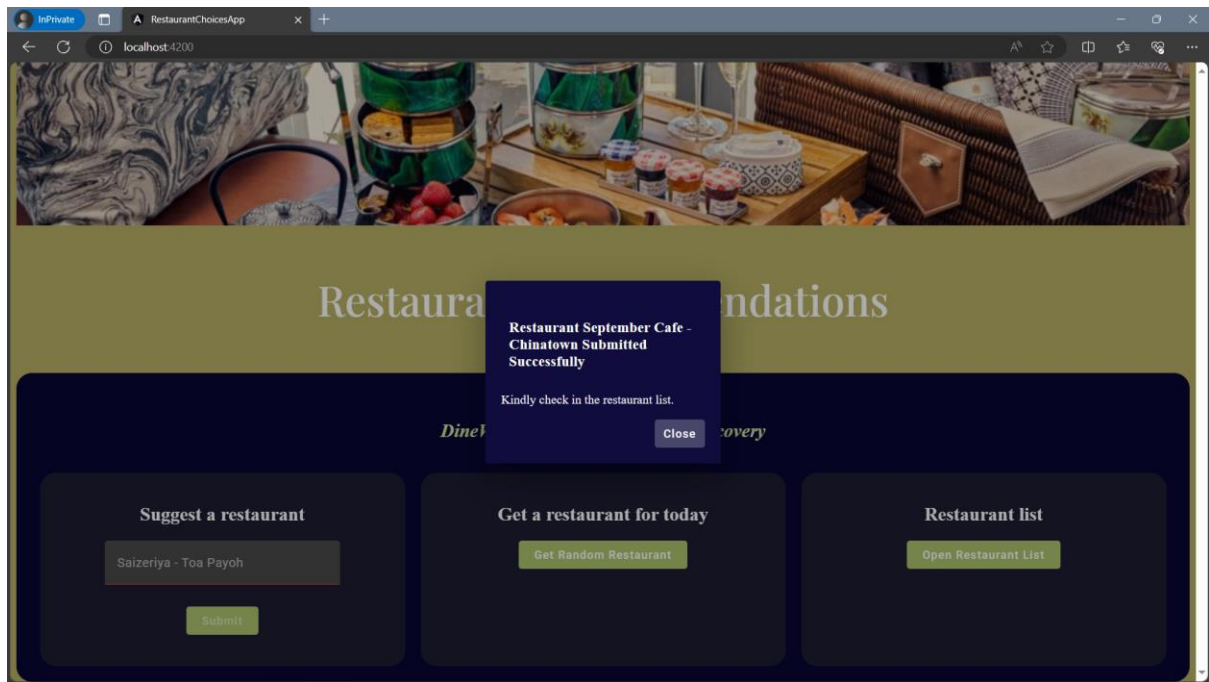

If restaurant name's pattern not "restaurant name –location", error message show.

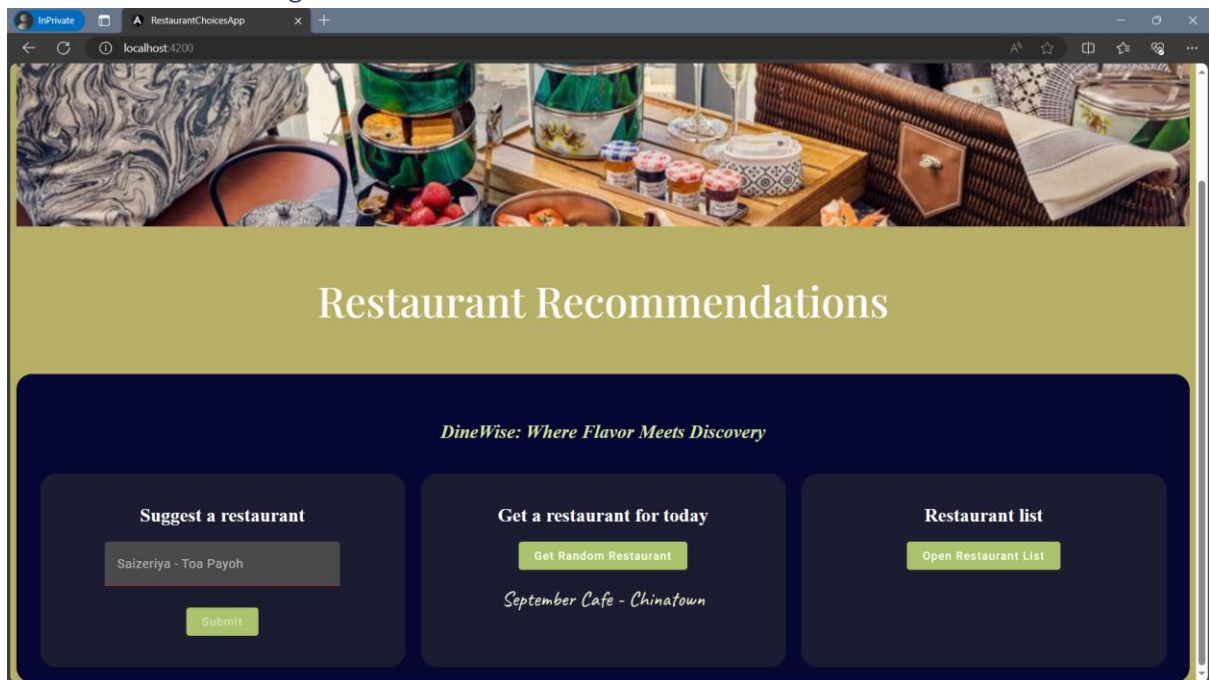

if enter correct restaurant name format and click submit. Pop up a dialog to show successful submission.

2. Random restaurant suggestion
click on the button to get a recommended restaurant.

3. View Restaurant List
Click the button to view all restaurants. List will close automatically if user press outside the restaurant list box.
